to me, Daniel

Hi Pam,

Thank you for phoning me back. Find herewith our discussion.

- We kindly require renting the whole front section with all the parking at the vacant house next to our site as a laydown area for small materials as well as to park vehicles. This will be maintained and kept neatly and will be returned to the owner to its original state or better.
- Our current temporary corrugated fence dividing the property and the new building need to be moved +-1.5m into the parking area to be able for us to erect scaffolding to complete the works on this façade.
- We need to remove 3 roof sheets on each carport in this section to be able to get our scaffolding built in this area. We will safekeep these sheets and re-instate back to original when we are done. We will replace any sheet might damage when we remove it.
- We will also cover the section of the house in this area with plastic to protect the house from concrete and mortar spills.

Can you kindly send us an approval for this with a revised rental amount for this whole area in front of the house.

We herewith acknowledge and agree that should you get an offer to buy or rent for this property, we will then remove all or materials and rectify all the areas with immediate effect.

Kind regards,

HENNIE JACOBS
